FROM Rep. James H. Scheuer, Chairman, Development and Popula-
 tion Committee

RE CIA Briefing on World Population Crisis

The Central Intelligence Agency has recently completed an extremely important report entitled Population, Resources and Politics in the Third World: The Long View. The report examines the impact on both developed and developing countries of the global population crisis. This notice invites you to a classified briefing by the analyst who authored the report, this Thursday, March 15.

While the research for this report has been gathered for years, the analysis and projections are even more startling than expected. Likewise, the conclusions underline the urgent need for Congress to address both the problems and the solutions. For instance:

- * What are the security ramifications of massive urban unemployment?
- * What are the military implications of severe water and energy shortages?
- * How should a democratic society like ours deal with border security and growing immigration?

The briefing will be given by author of the report and Director of Research, Office of Global Issues, Directorate of Intelligence, CIA. STAT

It will be on:

DATE: Thursday, March 15
PLACE: 2105 Rayburn Building
TIME: 11:00 a.m.

Since the report is classified "SECRET," the briefing will be for MEMBERS ONLY. Please RSVP to the Caucus office, on x63440, as to whether you plan to attend.
